

Viscount's Helpful Hints for Opening Your Pool With A Main Drain!

Above ground pools:

- Drain winter cover, then remove the cover being careful to not drop any debris into the pool.
- Remove plugs and put fittings back in.
- Hook up filter and hoses.
- Make sure both valves are open (handles should be VERTICAL).
- Refill the pool to the required level, halfway up the skimmer.
- Open the main drain and turn on the filter. Pool antifreeze will be filtered out of the pool.
- Vacuum out any leaves or debris in the pool.
- Add shock and algaecide. Wait 24 hours and then bring in pool water to be tested for proper chemical balance.
